Software Release Notes

Part Number: SW90118
Description: Power Control Center (PCC)
Release Number: 1.13
Release Date: 7/5/2013

New Features:

- N/A

Bug Fixes:

- Fixed issue in "Target Config" window in the "User's Value" column where values displayed in scientific notation with significant digits to the right of the decimal point were getting truncated such that the exponent value was truncated to an incorrect value.

- Fixed issue in "Target Config" window where the tool would crash if the user entered a decimal number (i.e. "1.23") in the "User's Value" column.

Compatibility Notes:

- This version of the PCC tool requires Microsoft .NET Framework 4 to be installed on the user's PC. To install .NET Framework 4, see the following link:
